BOUQUET PREPARATION

With Increased labor shortages, and other operational issues in Europe, Everflora sees an opportunity to prepare bouquets in Kenya for our customers. This is something we are very keen on, and can plan according to the clients needs so long as the bouquet line is a consistent weekly standing order for a longer time period.

ABOUT US

Established in 1995, Everflora Limited is located in Juja area Kenya, 40km from Jomo Kenyatta International Airport and sits on an altitude of 1700 meters.

“Pure expression of Love” means that we insist every bouquet that our flowers feature in, must bloom, and create a lasting impression on the florist, and their customer.

We have all our 38 hectares grown in HYDROPONIC. This is an additional investment, but one that provides high quality and strong productivity. It is when one enters our production greenhouse that an immediate difference can be felt – its just clean growing!

In a time when growing and transport costs are unabating, Everflora Limited still looks to reduce its carbon footprint. For this reason we have made a substantial capital investment in solar energy, which replaces roughly 20% - 25% of our dependence on the grid.

SEA FREIGHT

Since early 2022 we have been doing weekly consistent trials of our varieties by sea into Rotterdam. We view this to be very much part of our long term strategy, not only to aim to reduce cost of freight, but also further reduce our carbon foot print over a period of time. Please talk to us if you have requirements for sea freight shipments.

SUMMER FLOWERS

Seeing that the Dutch planting area for these beauties has reduced to near 50% from previous years, we view Kenya as being a perfect place to offer these to our customers in the years to come. We will have our first Summer flowers ready to market in late January / early February 2023.
